

The **Science of Spin<sup>®</sup>** program is consistently **voted the #1 favorite** by students and teachers. Your school can enjoy this excellent program absolutely

**TEKS Friendly!**

**FREE OF CHARGE!**

**TEKS Friendly!**

The program consists of an entertaining and **educational assembly** (approximately 1-hour), followed by **hands-on instructional clinics** in your P.E. classes for the balance of the day. The first half of the assembly, suitable for all ages, is titled **SPIN FUN and SAFETY**. The second segment, suitable for students in grades 3 and up, is the **SCIENCE OF SPIN**. Using multiple demonstrations and class participation, students are introduced to the concepts of **gyroscopic stability, planes of spin, distribution of mass, transfer of energy, levers, friction and simple systems**. *These concepts tie nicely into the TEKS objectives while the students are studying simple machines and motion.* (Visit [www.scienceofspin.com](http://www.scienceofspin.com) to see document of TEKS Objectives identified) Schools using the **CSCOPE** curriculum will find yo-yos specifically identified in their written materials regarding simple systems. P.E. teachers will be loaned an instructional video and a class set of yo-yos/spin tops so that they may continue the unit for one week following the assembly. An interdisciplinary curriculum guide featuring Social Studies (History), Language Arts, Science and Math is also provided for free to the school staff.

**PROGRAM SELECTION: 1) Assembly and PE clinics 2) Assembly only 3) PE clinics only**

**The NO FEE option.**

**School's obligation is to provide for sales of yo-yos/spin tops through the PTA or other venue and allow practice during recess periods and/or P.E. classes for a minimum of one week.\***

**Sales:** Yo-yo/spin tops are provided for the P.E. classes. It is not necessary for a student to buy anything. However, yo-yos/spin tops of the type used in the classes will be made available for purchase for five school days following the program. These fully guaranteed items sell between \$7.00 for the standard model, a mid-priced special yo-yo, and \$13.00 for the amazing, ball-bearing model. Should your school choose to increase the prices to your students by \$1 each, Science of Spin will donate 10% of the net amount to your school. *In either case, Science of Spin will be responsible to pay all Texas sales taxes on these items.*

**Practice at recess:** Yo-yoing/top spinning are great recess activities. Safety and appropriate use are stressed in both the assembly and the class instructions. When students are given their own "Spinning Zone" to practice, problems are virtually eliminated. Students enjoy building skills and teaching their classmates. \*Two P.E. days of instruction per class can be substituted for the recess play if desired.

**The FEE option.** The all-day program is also available without the sales and recess play for the regular price of \$695 plus travel expenses for the entire day or \$450 for the assembly only.

**Compare this instructional program with other assembly programs:**

- Not just a show but an exciting science presentation and an all-day instructional program with hands-on skill building in your PE classes
- The spintastic performance of champions with years of teaching experience
- Exclusive state-of-the-art take-apart yo-yos/spin tops that solve tangled string problems and are pre-adjusted for beginner play
